# Counting money

Animation script

Hello, everyone. I'm Anika, and I need your help with an important project. I've been given a vegetable patch in my school garden to grow vegetables for school lunches. I need to plan and buy some seeds and tools. I have £10 to buy everything, can you help me choose how to spend my money well and make sure I only buy things I really need? I have £10 to buy everything.

Let's start by thinking about the vegetables we want to grow. We need to make good choices and grow vegetables which can be used as part of a school lunch. I'd like to grow carrots, tomatoes, and potatoes.

Before buying items from the shop to grow the vegetables, we need to create a budget. A budget is a plan calculating how much money we have and how much we can spend on different things. Budgeting is important because it helps us make good choices.

When you help me plan what to buy, make sure you choose things really needed for the project. This is different to things you might like but aren't needed.

We'll be using an activity book to budget and write down what to will buy with the money.

Good luck with the planning.
